

AJMCEdu Excellence Identification Center (AEIC)

Comprehensive Ability Evaluation

The evaluation system of the AJMCEdu Excellence Identification Center is developed jointly by Chinese, American, Canadian well-known experts in the field of education and the first-line excellent English and mathematics teachers in China, combined with the English language proficiency section of the ELPAC series of exams, and the innovative thinking model of the CEMC Waterloo Intermediate Mathematics Contest. In response to the reform direction of oral and listening English exams announced by the National Senior High School Entrance Examination English Teaching Seminar, the Ministry of Education officially launched the "Strong Foundation Plan" in 2020 to cultivate talents with integrated thinking and excellent mathematical literacy. Therefore, AJMCEdu Excellence Identification Center developed the comprehensive ability evaluation system. The system is divided into three levels: EMPT test (level 1), EMIT test (level 2), ELTS test (level 3).

AEIC comprehensive ability evaluation system is sponsored by Wuhan Anjiao Meicheng Education and Culture Development Co., Ltd., co-organized by Hubei Changjiang Children's Publishing House, Hubei Fine Arts Publishing House, and the editorial department of "English Square" magazine. Washington International Student Experience (WISE) assists in probing, scoring and issuing test reports. WISE is located in the Pacific Northwest, one of the most beautiful areas in the United States. It provides a series of professional assessment tests and a rich and diverse educational experience for international students around the world. WISE has many years of professional experience in language teaching and assessment, and works closely with education departments and government departments around the world to provide support for the development of high-quality language education.

The EMIT test (level 2) is a high-quality international exam designed for learners at the elementary level. While maintaining the advantages of the American ELPAC (English Language Proficiency Assessments for California), the English test takes the characteristics of Chinese students into consideration and focuses on quality-oriented education. It also accurately evaluates the comprehensive language ability of Chinese students by using world standards in pronunciation, grammar and vocabulary presentation. The math test continues the characteristics of the CEMC Waterloo Intermediate Mathematics Contest, encourages students to use logical thinking to list problems, helps students improve their ability to solve math problems, and develops students' innovative thinking mode and brain mode. At present, all well-known high schools aim to cultivate citizens of the new era with Chinese soul and world vision. The test sets international thresholds for school admissions and selects outstanding students with international vision, comprehensive qualities and abilities. Many Chinese famous middle schools will take the EMIT test scores as one of most important admission criteria. Those who have excellent results in the EMIT test will be directly admitted by WISE American partner schools. WISE American partner schools include Northwest Christian School in Washington State, Pleasant Hill Adventist Academy in California, Champion Academy in Colorado, Highland View Academy in Maryland, and Blue Mountain Academy in Pennsylvania State and so on. (Please refer to the notes for the specific list of WISE US partner schools).

What is the ELPAC? ELPAC (English Language Proficiency Assessments for California) is an English language proficiency assessments designed by the Bureau of Education of California State. These assessments are aim at evaluating students' language abilities from kindergarten to K12.

ELPAC has a complete knowledge system and ability levels from kindergarten through high school. It is one of the most important reference standards of the top primary school, middle school and high school when they enroll students in America. It is also one of the most important standards inside the school to test its own educational system. ELPAC is authoritative, professional and scientific. The content is mainly aimed at mastering the comprehensive knowledge of kindergarten English, Primary School

English, Middle School English and High school English, it describes English language skills that the students need to acquire when they were at schools. It can measure their progress in learning English, as well as become an important reference condition when they apply for the next level of schools. ELPAC will lay a solid foundation for the students' future access in academic fields.

The Canadian Senior/Intermediate Mathematics Contest is like the Math TOEFL test in Canada, it is hosted by the Canadian Education Centre for Mathematics and Computer(CEMC) of Department of Mathematics University of Waterloo. The University of Waterloo has the only school of mathematics in Canada; it is also the largest school of mathematics in North America and the world. The Canadian Senior/Intermediate Mathematics Contest covering grades from 7 through 12, it's the official Canadian math test for high school students around the world, and it also has wide international influence. The test scores of it are recognized by all the schools around the world, high scores can be powerful competition advantages when students apply for the world-wide famous universities. This score is also an important condition in applying for all the majors in the School of Mathematics, Software and Engineering in University of Waterloo. It also becomes an important criterion for students to apply for the scholarship of these colleges.

The AJMCEdu Excellence Identification Center (AEIC) organizes the series of comprehensive ability evaluation series, which integrates and perfects the above two examination systems, independently researches and develops scientific and effective assessment and selection, rigorous thinking training and systematic and professional knowledge application, explores the unlimited potential of children, selects talents in mathematics, English and other subjects, and cultivate students who are willing to serve the country's major strategic needs and have excellent comprehensive quality. Those who have excellent results in the EMIT test will be directly admitted by WISE American partner school. At the same time, many Chinese famous middle schools will take the EMIT test scores as one of most important admission criteria.
